

# NEW PRODUCTS COMING SOON

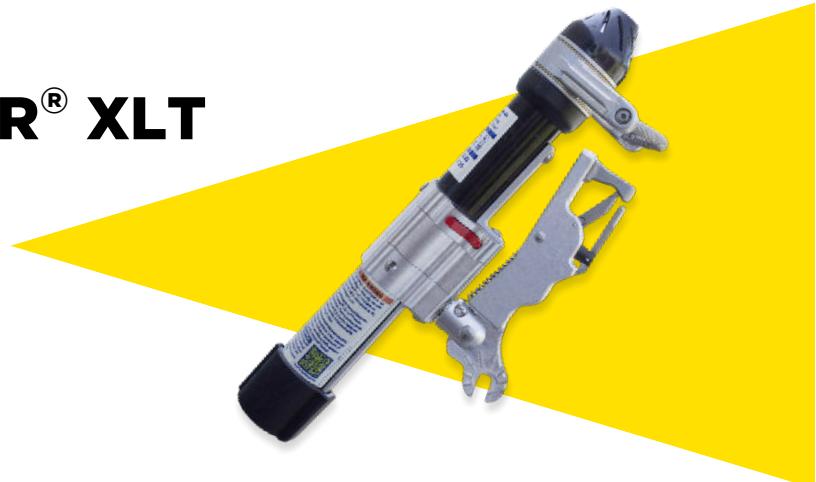

## XFMR-002

Redesigned with field input and enhanced features, the Load-Trainer II now includes a built-in 22" touchscreen interface. Building on the success of the XFMR-001, this next-generation trainer delivers deeper coverage of vectors, transformer nameplates, coil configurations, and advanced troubleshooting.

## GEN. 2 LOAD-RANGER® XLT

The 2nd Generation Load-Ranger XLT complements the FLEX-LT line with heavy-duty machined components and a service-friendly design, delivering the same rugged dependability customers expect from Utility Solutions.

## MAD STICK

The patent-pending MAD Stick is the first bucket stick designed to measure from the point of work, enabling lineworkers to confirm Minimum Approach Distance directly from the bucket. Built on the Take-Apart platform, it can be disassembled for cleaning, inspection, repair, or customized lengths.

# NEW PRODUCTS COMING SOON

## LONG HORN

The Longhorn upgrades traditional probe designs with slim, durable stainless steel and aluminum construction. Available in straight or curved options for improved fuse handling and control.

## SKY HOOK

The lineman-invented Sky Hook makes tool transport safe and easy. It ties into existing handline sets, offers multiple mounting points, and features a spring-loaded gate for secure locking.

## FIBER LIFT

The Fiber Lift delivers a fully machined, 500 lb.-rated solution for fiber installs. Spring-loaded gates provide a secure lock, enhancing both safety and ease of use.
